MULTILAYER FLEXIBLE WIRING BOARDS

REQUEST FOR REINSTATEMENT OF PATENT TERM ADJUSTMENT UNDER 37 C.F.R. § 1.705

MS ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

. Dear Sir:

In response to the Notice of Allowance dated December 27, 2006, showing a Patent Term Adjustment ("PTA") of 40 days, the Applicant(s) hereby request reinstatement of a PTA of 105 days, and submit the following supporting documentation:

- 1. A copy of the Notice of Allowance dated December 27, 2006, which shows a PTA of 40 days;
- 2. A copy of the Non-final Office Action dated April 1, 2004, which restarted the response period;
- 3. A copy of the Response to the Non-final Office Action filed August 2, 2004; and
- 4. A copy of the Patent Application Information Retrieval (PAIR) contents record showing the calculation of the Patent Term Adjustment (PTA).

Application No.: 10/028,624 Docket No.: 03310/023001

REMARKS

Please reinstate a PTA of 105 days for this application in view of the above supporting documentation and the following remarks.

The Notice of Allowance shows 40 days of PTA for the referenced application. However, Applicant believes that the 97 day reduction of the PTA for the response filed on August 2, 2004 is improper, due to the fact that the Examiner restarted the time period for reply after re-issuing the Non-final Office Action on April 1, 2004. Therefore, the response filed on August 2, 2004 was late by 32 days, not 97 days. Accordingly, the correct PTA should be 105 days, not 40 days.

Applicant respectfully requests reinstatement of 105 days to the term of the referenced application. Applicant(s) believes no fee is due with this response. However, if a fee is due, please charge our Deposit Account No. 50-0591, under Order No. 03310/023001 from which the undersigned is authorized to draw.

Dated: January 5, 2007

Respectfully submitted,

T. Chyau Liang, Ph.D.

TITLE OF INVENTION: PROCESSES FOR MANUFACTURING MULTILAYER FLEXIBLE WIRING BOARDS

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1400	\$300	\$0	\$1700	03/27/2007

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

- A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.
- B. If the status above is to be removed, check box 5b on Part B Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

- A. Pay TOTAL FEE(S) DUE shown above, or
- B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

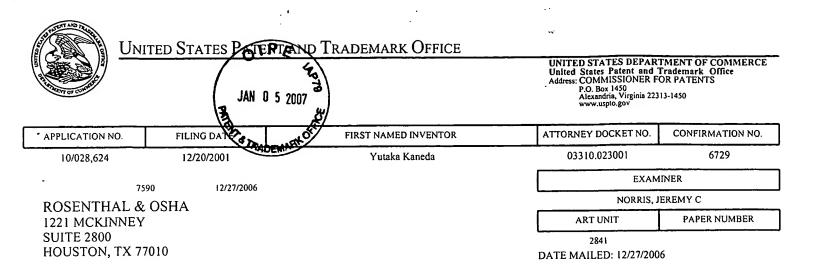

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

TANT D - PEE(O) TRAITOIMITTAL Complete and send this form, together we Rlicable fee(s), to: Mail Mail Stop ISSUE E Commissioner for attents P.O. Box 1450 JAN 0 5 2007 Alexandria, Virginia 22313-1450 or <u>Fax</u> (571)-273-2885 INSTRUCTIONS: This form should be took for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks I through 5 should be completed where appropriate. All further correspondence including the Patern divance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed of the patern of maintenance fee notifications. CURRENT CORRESPONDENCE ADDRESS (Note: Use Block I for any change of address) Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission. 7590 12/27/2006 Certificate of Mailing or Transmission ROSENTHAL & OSHA I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below. 1221 MCKINNEY **SUITE 2800** HOUSTON, TX 77010 (Depositor's name (Signature) APPLICATION NO. Change in Entity Status (from status indicated above) a. Applicant claims SMALL ENTITY status. See 37 CFR 1.27. ☐ b. Applicant is no longer claiming SMALL ENTITY status. See 37 CFR 1.27(g)(2). NOTE: The Issue Fee and Publication Fee (if required) will not be accepted from anyone other than the applicant; a registered attorney or agent; or the assignee or other party in interest as shown by the records of the United States Patent and Trademark Office. Authorized Signature Date Typed or printed name Registration No.

This collection of information is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 40 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 40 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Art Unit: 2841

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the claims – CANCEL claims 3-10.

Election/Restrictions

Applicant's election of Group I in the reply filed on 2 August 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 3-10 directed to an election non-elected without traverse. Accordingly, claims 3-10 have been cancelled.

Allowable Subject Matter

Claims 1, 11, and 12 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 states the limitation "wherein a plurality of wiring patterns corresponding to individual layers of a multilayer flexible wiring board are directly arranged on the same surface of the substrate in the width direction, which is perpendicular to the longitudinal direction of the substrate, and a plurality of the directly arranged wiring patterns corresponding to

Art Unit: 2841

multilayer flexible wiring boards are arranged in the longitudinal direction of the substrate". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy C. Norris whose telephone number is 571-272-1932. The examiner can normally be reached on Monday - Friday, 9:30 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-1984. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2841

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Art Unit: 2827

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a printed circuit board, classified in class 174, subclass 254.
- II. Claims 3-6, drawn to a mask for making a printed circuit board, classified in class 428, subclass 901.
- III. Claims 7-10, drawn to a method of making a printed circuit board, classified in class 261, subclass 48.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the device of the invention of group I could be formed by a screen printing apparatus as opposed to the photoetching apparatus claimed in the invention of group II.

Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 2827

806.05(e)). In this case the process of the invention of group II could be practiced by hand.

Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device of the invention of group I could be formed by a screen printing process as opposed to the photoetching process claimed in the invention of group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I, restriction for examination purposes as indicated is proper.

During a telephone conversation with Ms. Macy Golson on 20 January 2004 a provisional election was made with traverse to prosecute the invention of group 1, claims 1 and 2. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 2827

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2827

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the phrase "the present invention provides". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by US. 6,320,135 (hereafter Saito).

Saito discloses, referring to figure 9, a stock sheet for a flexible wiring board comprising a flexible sheet-like substrate (101, see figure 1), and a plurality of wiring patterns (112, 115) arranged in a predetermined direction on the substrate and corresponding to patterns on individual layers of wiring boards of a multilayer flexible wiring board [claim 1], wherein each wiring pattern is arranged in a direction perpendicular to a transporting direction of the substrate [claim 2].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Confirmation No.: 6729

Title:

PROCESS FOR MANUFACTURING MULTILAYER FLEXIBLE WIRING

BOARDS

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

REPLY UNDER 37 CFR § 1.111

In response to the Office Action dated April 1, 2004, please amend the application as follows and consider the included remarks.

IN THE ABSTRACT:

Please replace the abstract with the following.

In one embodiment, the present invention provides a A process for manufacturing a multilayer flexible wiring board, which allows individual layers of wiring boards to be precisely positioned and to be readily stacked. A mask for exposure is prepared in which a plurality of pattern holes corresponding to individual layers of wiring boards of a multilayer flexible wiring board are arranged in the direction perpendicular to the transporting direction P of substrate. This mask for exposure is used to form a plurality of wiring patterns corresponding to individual layers of wiring boards of a multilayer flexible wiring board on the same sheet-like substrate.

REMARKS

Please reconsider the application in view of the above amendments and the following remarks. Applicant thanks the Examiner for carefully considering this application.

Disposition of Claims

Claims 1-2 are pending in this application. Claim 1 is independent, and claim 2 depends from claim 1. Claims 3-10 have been withdrawn from consideration.

Restriction Requirement

Applicant hereby acknowledges that claims 3–10 are withdrawn from consideration due to a provisional election made in response to a restriction requirement to prosecute the invention of Group I, claims 1 and 2, on January 20, 2004 in a telephone conversation.

Specification

The Abstract is amended to conform to the Examiner's requirement. Accordingly, withdrawal of this objection is respectfully requested.

Rejection(s) under 35 U.S.C § 102

Claims 1-2 stand rejected under 35 U.S.C. § 102(e) as anticipated by U.S. Patent No. 6,320,135 ("Saito"). This the rejection is respectfully traversed.

The present invention relates to manufacturing a wiring substrate by arranging multiple identical wiring patterns in a predetermined direction on the substrate. Claim 1 recites a stock sheet for a flexible wiring board that comprises a flexible sheet-like substrate

and a plurality of wiring patterns that are arranged in a predetermined direction on the substrate and corresponding to patterns on individual layers of wiring boards of a multilayer flexible wiring board.

According to embodiments of the invention, the thickness of the substrate scarcely varies between the individual layers of the wiring boards. The dimensional changes in individual layers during the manufacturing process can be homogenized because a plurality of wiring patterns corresponding to the individual layers of wiring boards of a multilayer flexible wiring board are arranged on the same substrate. As a result, the present invention allows connecting electrodes on individual layers of wiring boards to be precisely positioned, thereby allowing the individual layers of wiring boards to be readily stacked. (See specification p. 6, l. 4 through p. 7, l. 5).

Claim 2 recites that each wiring pattern is arranged in a direction perpendicular to a transporting direction of the substrate. In addition, the variation in the thickness of the substrate or the like with different product lots can be minimized because the wiring paterns are arranged in a direction perpendicular to the transporting direction of the substrate. (See specification p. 7, ll, 6–9). Saito, on the other hand, discloses a predetermined wiring formed on a base film. Saito discusses a wiring pattern substrate that is formed when a copper layer is etched. In contrast to the present invention, as recited in amended claim 2, Saito fails to disclose that the wiring placed on the substrate (*i.e.*, the base film) is in a direction perpendicular to the wiring substrate. Further, Saito fails to disclose that the wiring substrate is "transported" in a particular direction.

In view of the above, Saito fails to show or suggest the present invention as recited in the claims. Thus, the claims are patentable over Saito. Accordingly, withdrawal of this

U.S. Patent Application Serial No. 10/028,624 Attorney Docket No. 03310.023001

rejection is respectfully requested.

Applicant believes this reply is fully responsive to all outstanding issues and places this application in condition for allowance. If this belief is incorrect, or other issues arise, the Examiner is encouraged to contact the undersigned or his associates at the telephone number listed below. Please apply any charges not covered, or any credits, to Deposit Account 50-0591 (Reference Number 03310.023001).

Date: 8/2/04

Respectfully submitted,

opethan P. Osha, Rog No. 33,986
